Education

University of North Carolina at Chapel Hill

- *B.S.* Computer Science
- *B.S.* Mathematics
- Minor in Entrepreneurship

Duke University

- Dual Enrolled through Robertson Scholars Leadership Program

Awards and Scholarships

- Robertson Scholar
- 2017 DAAD RISE Summer Research Scholar
- Reese News Lab Fellowship
- Thomas J. Watson Scholarship
- National Merit Scholar

Relevant Coursework

- CS 2106: Operating Systems - Fall 2017
- CS 2105: Networks - Fall 2017
- CS 2103: Software Engineering - Fall 2017
- COMPSCI 270: Introduction to Artificial Intelligence - Spring 2016
- MATH 361S: Numerical Analysis (Seminar) - Spring 2016
- COMP 541: Digital Logic & Computer Design - Fall 2016
- COMP 590: Introduction to 2D Graphics - Fall 2016
- COMP 550: Algorithms & Analysis - Fall 2016

Experience

RISE Research Scholar

Theory of Distributed Systems, University of Paderborn (Germany)

May 2017 - Aug 2017

I worked as a research assistant for the summer through the DAAD RISE scholarship program. My work concentrated on developing distributed routing approaches in hybrid networks with holes. My time was evenly split between researching and developing theory based approaches, and implementing network visualization tools for various topologies.

Reese News Lab Fellowship

360 Life Stream, UNC School of Media and Journalism, Chapel Hill

Aug 2016 - Jan 2017

As a part of the Reese News Lab fellowship, I worked on the 360 Life Stream project designed to live stream and archive footage from police arrests using cameras mounted on squad cars. My work focused on developing live video stitching software, optimized for the NVIDIA Jetson platform. I also worked with multi platform video encoding, and low latency video delivery from vehicles to fleet managers. This project involved extensive work using C++, Python, OpenCV, and the NVIDIA CUDA library.

Research Assistant

Zavlanos Lab, Duke University, Durham

Nov 2015 - May 2017

As a research assistant in the Zavlanos lab, I developed and built aerial SLAM platforms using quadcopters and off-the-shelf RGBD sensors for mapping and motion planning research.

Research Assistant and Web Developer

UNC Department of Economics, Chapel Hill

I led complete overhaul of the Airports Council International - North America facilities survey site as a part of a research group at UNC Chapel Hill. Project work included migrating 5 years of preexisting records from fragmented SQL tables into an adaptable, document based database, developing a RESTful backend for the survey, as well as designing both a responsive frontend questionnaire and an admin interface to view, analyze, and export historical survey data.
